

Subro Education at Your Desk – NASP WEBINAR

"Ambivalent Automation: Tesla, Uber, and the Self-Driving Debacle"

Tuesday, February 5, 2019 – 1 p.m. EST

Recent crashes involving vehicles while they were operating in an automated mode have brought further confusion to the already cloudy landscape of driverless cars. Overreactions and disinformation pervade the media narrative on the topic complicating matters even further. As a result, there is a need for a philosophical and physics-based framework by which automated collision events can be analyzed and understood. This presentation explores a multi-disciplinary approach to attempt to bridge the gap between the theoretical, social, and physical aspects of automated vehicle collisions. Approaching the problem with foundations in both automated vehicle research and development, as well as physics-based collision reconstruction, provides unique opportunities for the emergence of new understandings through the marriage of the unbounded optimism and adventure of the research world with the hardened practicality of the real world

Justin Schorr earned his undergraduate degree in Civil Engineering from Northwestern University in 2008 and earned his Master's (2010) and Doctorate (2015) degrees from The George Washington University in Washington, DC. Dr. Schorr has also completed specialized training in Collision Reconstruction from the Northwestern University Center for Public Safety, Event Data Recorders (EDR), and he is a certified drone pilot licensed by the Federal Aviation Administration (FAA). Dr. Schorr's most valuable training, however, comes from a lifetime of education provided by his father and grandfather – both of whom are Collision Reconstruction Professionals. Dr. Schorr's specialties are focused mainly in three areas: transportation engineering, applied mathematics, and intelligent systems engineering.

REGISTRATION FEE:

FREE – Members
\$150 – Nonmembers
\$75 – Nonmember Group Rate* (per person –3 or more from same company)

*Please contact Michelle Givvin to register groups.
Any questions – contact NASP – 1-800-574-9961.

WEBINAR INSTRUCTIONS:

1. Register and make payment at subrogation.org. You will then be given a link to WebEx to register.
2. Log-in information will be emailed to you from WebEx; a reminder will be sent **24 hours** prior to webinar.
3. **NOTE: If you do not receive the WebEx link, please check your "junk" email.**
